McClellan has too Much to Do to be Troubled by Members of Congress on Sprees. Henry J. Raymond writes from McCiel-

an's camp: If a regularly appointed committee of Congress should visit headquarters, with a view of obtaining information of importance to the public, such a visit might do good, and they would unquestionably meet with a hearty welcome from the Commanding General. But this is not the character of these visits. A member rushes to head-quarters, talks half an hour with Gen. Mo-Clellan, rushes back, and forthwith speaks with authority about the condition of things in the army of the Potomac. All this is very unjust, and seriously and mischievously misleads the public mind. No one who has not spent some time here can un-derstand how thoroughly Gen. McClellan's time and attention are occupied with his public duties. He examines personally every foot of his works and every part of the rebel ground accessible to his observation. Every earthwork thrown up, every gun mounted, every position taken, every regiment moved, and almost every gun fired are guided by his personal direction. Every hour not spent in the saddle is thus ab-sorbed in receiving reports and giving directions to his subgrdinate Generals, and any needless trespass upon his time and attention, which are absorbed in these duties, is an injury to the service and the

A severe and most determined battle was fought on the right wing Thursday and Friday, which is claimed by some of our officers as a successful strategic movement, into which the enemy had unwillingly been drawn, and which will soon result in the capture of Richmond and the entire rebel army. The attack was made by the ene-my in immense force, who crossed the Chickahominy, near the railroad, above Mechanicsville, Thursday afternoon. They fought desperately, but were unable to drive our men a single rod, though the ensmy were ten to one. The only forces engaged that day was McCall's division, the battle lasting from two till nine P, M., when the division was ordered back. The rumors here about foreign intervention are without foundation. Formal communication relating to the Butler affair at New Orleans, or other comparative trifies, are readily construed or magnified into intervention. Exactly the opposite is under-

The infantry fight was then renewed, and, according to the statement of my informand fled. ant; Surgeon Humphreys of the Pennsylvania bucktail regiment, continued until about 7 A. M., when a retreat was ordered, very much against the will of the Pennsylvania boys, who begged to be allowed to hold their position.

The outer forces then began to fall back. Porter's corps were some distance below Dr. Gaines' residence.

Of the next day's battle the correspondent says the cannonading and musketry was terrific. Duryea's gallant Zouaves were lying upon the ground for two honrs, while our batteries were shelling the woods over them. Finally, towards night, the enemy attempted to break the center line, in front of Duryea's Zonaves.

The musketry firing became terrific, last-

ing twenty or thirty minntes. Short!y af-terwards an attempt was made to break through the right, which was repulsed, and half an hour later another attempt was made on the left with the same result. The battle had then been raging for some hours, without any apparent change or advantage on either side. Reinforcements of artillery and infantry then came steadily along over

the bridge to the field of battle. The enemy then seemed to make their last desperate and determined effort, and crossed that long narrow bridge. SPEECE FROM THE PRESIDENT -- On the departure from West Point of the train conveying President Lincoln, the cro-d

enemy fell back to the woods, and thus matters stood up to 11 o'clock yesterday, Sunday morning. At dark an attack was made along the front of the entire line, and was resumed at 2 A. M. in front of Generals Hooker, Kearney and Sumner, without material result.

Another correspondent says of Friday's battle: Twice, all along the front, did the rebels attack our lines, our rifle pits and redonbts. Porter, with fifty cannon, and Sumner's, Hooker's and Ayres' gunsmoved them down with a death harvest. Their loss in killed and wounded was horrible. Under date of Friday, midnight, the mane correspondent says ten guns were taken from us by a sudden flank attack covered by the thick smoke which hung around.

Count De Paris captured a rebel Major

PATENT WATER DRAWER .-- We have examined the model of a very neat and ingenious water drawer, patented by Messra. Brown & Kent, May 20, 1862, and one of the articles complete is now working at Gathright's stove store, on Market street, be-tween First and Second streets, where Mr. Joseph Kent, of New Albany, can be seen, who will fully explain its operation. The well curb is of the usual pattern but it has a cylindrical windlass with conical ends, and so arranged that when the rope is wound round it, in ascending, the bucket is thrown from the centre of the cylinder to the apex of the cone, near the side of the curh. At the same time, a double chain attached to a valve in the bottom of the bucket is worked by a lever so as to open the valve and let the water fall into a discharging spout in the side of the curb. If more settlement of Birch Musselman, their guar- water is drawn than is required, the surplus is received in a dripping spout and carried back to the well. This prevents the ground from becoming wet in and covered with ice in winter. The appa ratus is put up, complete, for six dollars, which is not more than fifty cents dearer than a curb without improvements, and when they are attached a child can easily turn the crank and draw water. Mr. Kent is ready to adapt them to any wells, and they strike us as a very great saving of time, labor and trouble. Those whose premises are not fitted with pumps, should not fail to have this new water drawer put up. Having seen this ingenious piece of mechan-

TELEGRAPHIC

Davis and Farragut's Fleets Communicating---Attack on Vicksburg---Van Dorn in Command of Rebels.

From General Curtis' Army.

PHILADELPHIA, June 30. The following is the conclusion of the Baltimore American's account of affairs before Richmond: WASHINGTON, June 29.

Since closing my letter from the White House, I find myself in Washington City, and in possession of most reliable informa-tion from White House, and other points on the Peninsula, nearly a day later than that contained in my letter.

It appears that telegraphic communica-

tion between White House and Gen. McClellan was not broken at 1 o'clock Saturday, and then the wires were cut at a station 11 mile out. Tunstall's station, four miles out, was

in our possession until 4 o'clock in the afdernoon, at which hour the operator at White House heard a strange signal coming over the wire; on going to the instrument, he was heralded with what Union soldiers call the rebel national salute: "Say, oh you Yankee." This was the signal given for final evac-

uation, when a portion of the infantry forces immediately embarked on steam-boats in waiting for them. The last of the transports was moved off by steamings, and a few articles scattered about on shore, even some damaged hay, fired. The whole was of very small value, and thus of the many millions of property here a few days ago, perhaps not \$5,000 worth was destroyed. In the midst of this the White House was fired and entirely consumed. The enemy made his appearance in considerable force at the White House, at about o'clock on Saturday evening, and although he neither found bread for men or hay for beast, was welcomed with heavy showers of grapeshot from the gunboats, which were ranged along in front of the building. The

rebels were supposed to be 30,000 strong.

The cavalry at the White House guarded the departure of the last wagons and horses, which moved off at the Federal evacuation and joined the force of General Stoneman, who were hovering in the vicinity all day. After seeing their trains off, and securing their entire safety, General Stoneman, with the entire force, moved off in a direction

that I am not at liberty to state. even a contraband.

At 10 o'clock on Saturday morning, Colonel Ingall's and Captain Santelle were before Yorktown with an immense convoy of vessels and steamers, on their way to the new base of operations on James river. They would doubtless move down immediately to Fortress Monroe and await the instructions of General McClellan. A number are already up the James river under the protection of the gunboats.

Since an early hour Saturday morning, Gea. McClellan has been deprived of a tele-graphic communication with Washington. He abandoned its use several hours before it was cut, doubtless being fearful that the enemy might, by placing a magnet on the wires, read his orders. Direct communication with Gon. McClellan is now being opened by the gunboats up the mouth of the Chickahominay.

New York, June 30. The New York Herald's report, dated the 27th, states our killed, wounded and missing that day reached 1,200. The object of the movement was to bring Porter's and other divisions into more close

connection with the rest of the army; in fact, changing the front of the whole of our forces, with our center and left pressing on Richmond. It was expected on Saturday. It was a virtual surrender or vacating of a long line of defenses heretofore just up to Mechanicsville. In order to have the whole force within effective distance, also to allow the rebels to follow np, and, if possible, to bag them, McClellan ordered Gen. Porter to withdraw two miles this side of Gaines' Milis, early on Friday morning, which was done the evening following, the rebels thinking they had gained a victory over our troops, slowly moving back in order, fighting as they went, crossing the Chickahominy, and reached the position designated for

their occupation.

The rebels followed in great force, and by three o'clock in the afternoon there was a general and heavy engagement here, last-ing till 7 o'clock, when a lull took place; but the rebels again renewed it with greater ferocity, having been reinforced. Our men stood the unequal contest like heroes, and did fearful execution. Our forces were increased by Generals Slocum's, Palmer's, French's and Meagher's brigades, and the rebels were badly beaten. Meagher's went rolled up, fighting like tigers.

was occupied and held. In the first part of tended against the rebels, but subsequently reinforcements swelled the number to 45,000. The rebels had 60,090 men under Generals Lee, Hill, Anderson and Branck. Among the killed are Colonel Grove, of

the 22d Massachusetts, and Colonel Roberts, of the 1st Michigan. PHILADELPHIA, June 80. The correspondent of the Baltimore American arrives at the following cenclusion: The object of General McClellan was

to abandon White House, and draw in the right wing of his rrmy across the Chickahominy, which he has accomplished with but little loss in comparison with the punishment bestowed on the enemy. Gen. McClellan has also strengthened his position by contracting his lines and changing his base of operations to the James river, where he will have the co-operation of the gunboats, and if they attempt to interrupt James river, they will meet with prompt punishment from the gunboats, and so weaken their forces in front of Richmond that the city will fall into his hads with but a slight struggle.

MEMPHIS, June 28.

While this was going on, Mitchell is moving in our rear in the vicinity of Battle creek. onr rear in the vicinity of Battle creek, waiting to fall upon his prey.

The Grenada Appeal of the 25th says General Van Dorn advised all the families of Vicksburg to move eight miles back from the river. He intends to defend the depart-

ment to the last extremity. It also says that on Saturday last the Federal mortar fleet, in tow of tug boats, was reported at Grand Gulf, by our batterles. On the same day the gunboats at Vicksburg opened a brisk fire on the batteres, and continued ever an hour without

doing injury.
Of affairs in Arkansss, the Appeal says
the rapid movements of General Hindman's forces have almost rid the State of Curtis' army; that they succeeded in driving him back to a position within a short distance of the Missouri line. When our informant Jest they were still retreating.
At the election in this city on Thursday,
John Park, Union candidate for Mayor, reoeived all the votes cast—724.

Mr. Blair, in advocating the bill, said we cannot calculate upon the good feeling and friendship of Great Britain; that Government has represented persons, who have private ends to accomplish, nor yield to such a newspaper pressure. Considerations.—When a man dies, and hle affairs are placed in the hands of executors, his fan aily want immediate cash on hand to pay off necessary expeases and to live, giving time to the executors to close up his estate without sacrifice of property by forced sale, or otherwise. No better plan could be devised for this purpose than a Life policy. The ten year non-forfeiture theory of the New York Life Insurance Company, is but a proposition to deed to one's family, to take effect on his decease, too, provided the party lived to make them, and should he die within the ten years, then possession at once, having paid so much less tax.

New Nanz, June 30, P. H.

From Gen. McClellan's Army. EXCITEMENT AMONG THE CONFEDERATES-PROF. LOWE'S BALLOON FIRED AT.

We take the following from a letter dated New Bridge, June 23, published in the Philadelphia Inquirer:

For several days the rebels opposite here have been excessively jubilant about something. A brass band played early in the morning, during the day, and sometimes very late, even into the wee small hours of the night. We knew there was some cause for it. We knew they were not yet evacuating, for, from the balloon, we could look down upon them in the open fields and find no change had come over the spirit of their dreams, and that they still expected to hold their ground before Richmond until we attacked them. But

gradually we found out what was going on. In the woods above Lewis Hill last Fri-day we heard a report of a heavy gun, a whizz grew louder and louder, and an ex-plosion a mile in the rear of where our Sibley was pitched enabled us to come to the conclusion that the rebels had been mounting heavy guns within range of our tenpound Parrotts. The band was amere piece of braggadocio to get the men to work with a feeling of security. They know our guns could prevent them were we so disposed, so they put on as bold a front as possible—and succeeded. They have felled the woods around the guns, and in front have formed Mantles and Shawls, an abattis by felling the trees crosswise.

One of the guns fired is the siege gun we

left on the hill, near the Stone Bridge; one is a 32-pound Parrott gun. And, strange to say, Secesh has really made an improvement in the shape of casting the shot and shell; at least, our artillery officers here say it is an improvement. They make the base of the shell follow, like the bottom of wine-bottle, but the rim runs out thin, instead of being blunt. They have an English gun, firing 42-pound shell, similar to those at Yorktown. They have also a number of 10-pound Parrott guns, but they generally make miserable aring.

While Professor Lowe had one of his bal-

loons up the other day, they opened on hira, and the first shot passed between the roges; the next fell within a hundred yards of where the detail of men were holding the guy ropes, but did not explode; he made' a descent, and reporting the location of mat-ters, anchored his balloon in a ravine. Not to be outdone, the professor soon had a quantity of shovels and apades brought, and in a short time he had a sufficient number of bomb preofs thrown up, from which the men could operate the ropes in safety. He thinks he is perfectly secure in the ear of the balloon, when up, at any hight, as they must fire at a great elevation to hit him, and the chances are a hundred to one in favor of missing both the ear and bal-

And the correspondent of the New York World, writing on the same day, says: "EVACUATION."

I'm sick of that word. I hope the enemy is. But I am bound to record any symptoms of it on his part. What if we should have another-skedaddle? I don't think we will. But here are the facts of to-day, and as they are the freshest, newest and most startling of my day's gallop in this broiling sun, the public must have them to cues and at their breakfast. Item Our forces at Mechanicsville report that while the enemy's pickets are as strong as ever, their camps have been suddenly and exdepleted. They onnot tell whither they have gone. Rem-Hooker, Kearney and Richardson report from the left that the strong force of pickets heretofore maintained by the enemy have been withdrawn-how far, they are now endeavoring to ascertain. Item-The enemy directly in front of our right, their strong point, are as strong as ever, far aught we can see, and have been more than usually noisy with, their artillery today. All this is readily accounted for if they really are leaving. Item.—During all last night there was distinctly heard, throughout the whole of our lines, the roar Brandeis & Crawford and rumble of artillery and haggage wagons over the roads 'ou and Richmond, beside a confusion of citier sounds, all indicating a hurried departure of unwieldy substances—

yust like energiation. Item.—This morning Grain, delivered a our store or any good shipping hurried departure of unwieldy substances just like en evacuation. Item .- This morning we have heard eight or ten heavy and rumbling sounds, like distant explosionsjust like those at Yorktown and subsequently several thick and dark clouds of smoke Richmondward, as if hanging over the city, attracted all our eyes, and we-

Yorktown and Corinth have defined the primary symptoms of an evacuation as dis-tinctly as those of a case of small-pes. We ought to know it if it is so. We will But, then, the enemy can't skedwiddle.

GREENMAN & TRUE'S NEW SHUTTLE

Sewing Machine! WARRANTED THE BEST IN THE MARKET. Elias Howe, Jr., and S. H. Roper's Combined Patents.

Straight-Line Movements, Original Transverse Shuttle, and Periphery Clamp Food-Wheel.

THESE SEWING MACHINES COMBINE THE most recent improvements, are nearly noiseless when in operation, run with the greatest case and rapility, and are better adapted for seneral purposes and family use than any other. They are not liable to get out of order, are exceedingly simple, and are made expressly for real practical utility; they do every variety is evening, from the finest woven these to the heaviest woolen goods, both tailoring and fine leather work. Any person may learn to operate them in a very short time. the great difficulty with all other old-style Machit too much complication, respiring as much excit The great dimenty with all other old-style Machine is too much complaction, requiring so much constant adjustment, and such an amount of mechanical still and ingenuity to use them to advantage, as to render them of little comparative value.

But the isewing hischines manuactured by Greenman & True are not limble to these objections, as any person, on even a moment's examination, will readily discover. They will do more and better work than any other hischine ever offered to the sphile, making the most beautiful lock-stitch, allks on both sides. Send for an off-hand specimen of sewing gion any material you wish, and you will then see now it is done. AGENTS WANTED IN EVERY TOWN
